AUTO-MANUAL DUMP
CHANGE-OVER

DESIGNED FOR

ADULT - BABY - FEM

WHY BALE?

CONVERT YOUR PLASTIC WASTE INTO CASH

Integrated **automatic pelletizing technology** automatically transports your plastic waste streams to a centralized location and converts the plastic waste streams back into **valuable pellets**. Operational **efficiency** increases through reduced man-effort and high pellet re-sale value **maximizes profit margins**.

State-of-the-art pelletizing technology **maintains polymer quality** whilst removing any unwanted contaminants. Our newly developed technology assists our partners to achieve their environmental targets, reduces CO2 emissions & boosts profit margins. It's a **WIN** for the **environment** & our **partners**.

DIAPER®

RECYCLING TECHNOLOGY

Next generation air-less diaper recycling technology supporting the next generation of converters around the globe.
